Jet Blend Bio Swale Mulch #1

Value:

Engineered to meet Stormwater Protection Bio Swale requirements.
Improves water infiltration rate.
Reduces stormwater urban runoff and pollution, volume and velocity.

Recommended Uses:

Typically applied on 2:1 slopes or flatter at a minimum thickness of 2" – 3" deep.

Best Practices:

Easily applied by pneumatic blower truck on slopes or flat areas at a minimum depth of 2"-3" (270-400 cubic yards/acre).

Jet Blend Bio Swale Mulch can be applied around existing plants, directly on soil or over Geotextile barrier fabric.

Best used as a top mulch over Bioretention soil mixes.
